Зам. капитана порта Ванино

С.А. Сыряев

Старший инспектор ИГПК

В.Г. Ворожцов

77594 СУДС
57305 ВМТП

The first part of the document discusses the importance of maintaining accurate records of all transactions. This includes not only sales and purchases but also any other financial activities that may occur during the course of the business. It is essential to ensure that all records are kept up-to-date and are easily accessible for review.

In addition to maintaining accurate records, it is also important to regularly review the financial statements. This will help to identify any potential issues or trends that may arise over time. By staying on top of the financial data, you can make more informed decisions about the future of the business.

Finally, it is crucial to seek professional advice when needed. A qualified accountant or financial advisor can provide valuable insights and guidance on how to best manage the business's finances. They can help you understand the implications of various financial decisions and ensure that you are following the most appropriate course of action.

By following these guidelines, you can ensure that your business's financial records are accurate and up-to-date. This will help you to make better financial decisions and ensure the long-term success of your business. Remember, accurate record-keeping is the foundation of sound financial management.

The second part of the document provides a detailed overview of the various financial statements that a business should maintain. These include the balance sheet, the income statement, and the cash flow statement. Each of these statements provides a different perspective on the business's financial performance and is essential for a comprehensive understanding of the company's financial health.

The balance sheet shows the company's assets, liabilities, and equity at a specific point in time. The income statement shows the company's revenues, expenses, and net income over a period of time. The cash flow statement shows the company's cash inflows and outflows over a period of time. Together, these three statements provide a complete picture of the business's financial performance.

the user's needs. The user's needs are not necessarily the same as the user's requirements. The user's needs are what the user wants, while the user's requirements are what the user needs to achieve a specific goal.

The user's needs are often expressed in terms of requirements. For example, a user might say, 'I need a book on the history of the world'. This is a requirement, not a need. The user's need is to learn about the history of the world.

The user's requirements are often expressed in terms of needs. For example, a user might say, 'I need a book on the history of the world'. This is a need, not a requirement. The user's requirement is to have a book on the history of the world.

The user's needs and requirements are often expressed in terms of information. For example, a user might say, 'I need information on the history of the world'. This is a need, not a requirement. The user's requirement is to have information on the history of the world.

The user's information needs and requirements are often expressed in terms of knowledge. For example, a user might say, 'I need knowledge on the history of the world'. This is a need, not a requirement. The user's requirement is to have knowledge on the history of the world.

The user's knowledge needs and requirements are often expressed in terms of skills. For example, a user might say, 'I need skills on the history of the world'. This is a need, not a requirement. The user's requirement is to have skills on the history of the world.

The user's skills needs and requirements are often expressed in terms of attitudes. For example, a user might say, 'I need attitudes on the history of the world'. This is a need, not a requirement. The user's requirement is to have attitudes on the history of the world.

The user's attitudes needs and requirements are often expressed in terms of values. For example, a user might say, 'I need values on the history of the world'. This is a need, not a requirement. The user's requirement is to have values on the history of the world.

The user's values needs and requirements are often expressed in terms of beliefs. For example, a user might say, 'I need beliefs on the history of the world'. This is a need, not a requirement. The user's requirement is to have beliefs on the history of the world.

The user's beliefs needs and requirements are often expressed in terms of actions. For example, a user might say, 'I need actions on the history of the world'. This is a need, not a requirement. The user's requirement is to have actions on the history of the world.

The user's actions needs and requirements are often expressed in terms of results. For example, a user might say, 'I need results on the history of the world'. This is a need, not a requirement. The user's requirement is to have results on the history of the world.

The user's results needs and requirements are often expressed in terms of goals. For example, a user might say, 'I need goals on the history of the world'. This is a need, not a requirement. The user's requirement is to have goals on the history of the world.

The user's goals needs and requirements are often expressed in terms of values. For example, a user might say, 'I need values on the history of the world'. This is a need, not a requirement. The user's requirement is to have values on the history of the world.

The user's values needs and requirements are often expressed in terms of beliefs. For example, a user might say, 'I need beliefs on the history of the world'. This is a need, not a requirement. The user's requirement is to have beliefs on the history of the world.

The user's beliefs needs and requirements are often expressed in terms of actions. For example, a user might say, 'I need actions on the history of the world'. This is a need, not a requirement. The user's requirement is to have actions on the history of the world.

The user's actions needs and requirements are often expressed in terms of results. For example, a user might say, 'I need results on the history of the world'. This is a need, not a requirement. The user's requirement is to have results on the history of the world.

the 1990s, the number of people with a mental health problem has increased in the UK (Mental Health Act 1983, 1990).

There is a growing awareness of the need to improve the lives of people with mental health problems. The Department of Health (1999) has set out a vision of a new mental health system, which will be based on the following principles:

- (i) People with mental health problems should be treated as individuals, with their own needs and wishes.
- (ii) People with mental health problems should be given the opportunity to participate in decisions about their care and treatment.
- (iii) People with mental health problems should be given the opportunity to live in their own homes and communities.

There is a growing awareness of the need to improve the lives of people with mental health problems. The Department of Health (1999) has set out a vision of a new mental health system, which will be based on the following principles:

- (iv) People with mental health problems should be given the opportunity to live in their own homes and communities.
- (v) People with mental health problems should be given the opportunity to participate in decisions about their care and treatment.
- (vi) People with mental health problems should be treated as individuals, with their own needs and wishes.
